
Laser Institute in Westlake

Laser Institute in Westlake

Renaissance Laser and Vein Institute specializes in providing Westlake clients access to the most effective, cutting edge laser treatments.

Thanks to the technological advancement of cosmetic lasers, they can now solve problems ranging from uneven skin tone to severe varicose veins. Different types of lasers have been created to achieve varying strengths and alternate depths of skin penetration in order to target multiple skin care and aging issues. Improving the skin's texture, tone and clarity can be as simple as a few treatments with the Titan laser, or it might involve a multifaceted approach with different lasers to create the best overall improvement. Much of the recommended course of laser treatment is dependent upon the individual plastic or cosmetic surgeon consulted, which is precisely why patients should take the time to find a highly qualified laser treatment center. Southern California residents located near Thousand Oaks, Malibu, Westlake, Calabasas and Simi Valley rely on the skills of Dr. Kouros Azar, Dr. Gholam Mohammad-Zadeh, and Dr. Mohammad Gharavi of the renowned Renaissance Laser and Vein Institute.

The Renaissance Laser and Vein Institute's patients reap the rewards of being treated by experts in the vascular, reconstructive and cosmetic surgery fields. Among the most popular treatments in the Laser and Vein Institute are the Titan laser treatment, the Pearl treatment, Laser Genesis skin Therapy, spider vein removal and varicose vein removal. The Thousand Oaks-based clinic also offers their Westlake, Simi Valley, Malibu and Calabasas patients rejuvenating Photofacial treatments, Microdermabrasion, and laser hair removal. Often times a combination of treatments is prescribed to target multiple skin care concerns. The Renaissance Laser and Vein Institute is known for their special 3-D Skin Rejuvenation technique that includes a three-pronged approach to achieving more youthful skin. The 3-D Skin Rejuvenation combines the benefits of Laser Genesis, IPL Photofacial treatment and the Titan Procedure to create a dramatic, lasting difference in the skin's appearance. Westlake, Simi Valley, Thousand Oaks and Malibu patients no longer have to trek to Beverly Hills to find qualified laser specialists and cutting edge treatments - with the Renaissance Laser and Vein Institute, the highest standard of care and procedures is now in their own backyard.
