
Laser Institute Malibu

Laser Institute Malibu

The Renaissance Laser and Vein Institute offer the latest in cutting edge cosmetic laser rejuvenation procedures. Malibu residents love achieving the quick results that the Laser Institute offers with very little downtime and minimal risk. Among the Institute's most popular laser procedures for Malibu beach dwellers are the Titan Laser procedure and Laser Genesis treatment. The Titan Laser is a powerful laser procedure that encourages the rapid production of collagen in the skin for a dramatic tightening of loose skin and wrinkles. The Laser Genesis treatment is the perfect antidote for days spent languishing on Malibu beaches since it works to eliminate sun spots and UV damage on the skin. The result is smoother, younger looking skin that defies the effects of the Southern California sun. Regular cosmetic laser procedures from the Renaissance Laser and Vein Institute helps Malibu residents stay young as well as turn back the clock, while still enabling them to enjoy the beautiful weather and beaches that the area has to offer.

Malibu is one of Southern California's most beautiful locations. Boasting miles of pristine, sandy beaches, delicious restaurants and breathtaking views, Malibu is also known for its equally beautiful residents. Many celebrities and wealthy individuals choose to reside in Malibu thanks to its laid back lifestyle and perfect location. With so many actresses and actors living in Malibu, it follows that many Malibu residents receive regular laser cosmetic treatments. Living on the Malibu beaches can be an invitation for sun overexposure, which is known to cause premature aging like wrinkles, sagging skin and sun spots. To combat the effects of living on the beach, Malibu residents turn to the trusted Renaissance Laser and Vein Institute, located a quick drive away in Thousand Oaks and Encino.
