## Cosmetic Laser Surgeon

Though laser cosmetic surgery can seem like a benign procedure, it can have the same severe consequences as other cosmetic procedures if performed improperly. Cosmetic laser surgery is an elective procedure, and for that reason some people do not realize that the lasers used can be very dangerous in the hands of an inexperienced cosmetic surgeon. Make no mistake; even cosmetic laser surgery can cause lasting scars and disfiguration if performed by a poorly trained, unqualified doctor. For these reasons, finding a skilled and highly recommended cosmetic laser surgeon is of utmost importance in achieving the cosmetic laser results a patient desires. Cosmetic laser surgeons should be well trained and highly regarded within their field to ensure that they have the background necessary to achieve great results with their patients.

The Renaissance Laser and Vein Clinic is helmed by leading Southern California cosmetic and vascular surgeons, Dr. Gholam Mohammad-Zadeh, Dr. Kouros Azar, and Dr. Mohammad Gharavi. The three highly qualified doctors perform cosmetic laser surgeries as well as varicose vein treatment, spider vein removal and reticular vein removal procedures. The cosmetic laser procedures they offer include the Titan laser treatment, the Pearl Treatment, the IPL skin therapy, microdermabrasion and Laser Genesis treatment. Southern California residents come from across the county to visit the Renaissance Laser and Vein Institute's highly qualified laser cosmetic surgeons. The cosmetic surgeons meet with each patient individually to create a custom laser treatment plan. This ensures that all of the patient's concerns are addressed on a case by case basis; the Institute never applies a blanket approach to cosmetic laser surgery. This commitment to customization and patient care has helped build the Institute's stellar reputation in the Southern California region.
