# Laser Skin Rejuvenation Thousand Oaks

## Laser Skin Rejuvenation Thousand Oaks

At the Renaissance Laser and Vein Institute in Thousand Oaks, we are specialists in laser skin rejuvenation. The term laser skin rejuvenation sounds simple, but it actually encompasses a wide range of methods, technologies and lasers that can be used alone or in tandem to revitalize the skin. The laser skin rejuvenation options at our Thousand Oaks office includes the Pearl laser, the Titan laser, Photofacials, Laser Genesis and laser vein removal. Our expert team of Thousand Oaks cosmetic surgery specialists can help determine the type of laser skin rejuvenation that will best achieve each individual patient's skin care goals. The beauty of the different laser skin rejuvenation treatments that we offer is that many of them can be used in tandem to truly turn back the clock and create glowing, youthful, radiant skin.

Although the Pearl laser and Photofacials are laser skin rejuvenation techniques that target primarily the face, Laser Genesis, laser vein removal and the Titan laser can actually be used all over the body. These laser skin rejuvenation treatments enable our Thousand Oaks patients to enjoy beautiful, smooth and even toned legs, arms, chests and necks in addition to lovely, youthful looking skin on the face. The Renaissance Laser and Vein Institute is renowned for the knowledge and skill of our medical staff, as well as their caring manner treating and relating to our Thousand Oaks patients. For the best care and technology in laser skin rejuvenation, the Renaissance Laser and Vein Institute is proud to be a Los Angeles leader.
