Welcome to the Renaissance Laser & Vein Institute

{youtube}KSjQo5IWwN8|350|250|0|{/youtube}

The Renaissance Laser and Vein Clinic is a top destination for Los Angeles patients who are looking for the best laser skin center in the area. Serving patients from Thousand Oaks and Simi Valley to Malibu and Westlake Village, the laser skin center is brimming with talented plastic surgeons, well trained support staff and the latest in laser skin care technology in the area. Serving patients from Thousand Oaks and Simi Valley to Malibu and Westlake Village, the laser skin center is brimming with talented plastic surgeons, well trained support staff and the latest in laser skin care technology. Though there are many laser skin centers in Southern California, it is very important to find well-established clinics that are run by seasoned professionals who specialize in lasers.

The differences between older laser equipment and the latest laser equipment are vast, as are the results and downtime. By choosing a laser skin center like Renaissance, with the most up-to-date laser treatments and technology, patients will ensure themselves better results, faster healing time and a targeted treatment for their skin care issue. Old skin care lasers used to simply burn off layers of skin with a harsh one-size-fits-all approach to laser skin care treatment. Technological advancements and refinement in lasers have enabled laser skin centers to treat a patient's skin maladies with exacting precision.

Instead of using just one ablative laser, modern laser skin centers like the Renaissance Laser and Vein Clinic have a selection of the best laser treatments available such as the Titan Procedure, Laser Genesis Procedure, the Pearl Treatment, and IPL Treatment. Each of these laser treatments specifically targets a particular skin care malady such as wrinkles, hyperpigmentation, acne scars, uneven skin tone, redness and texture. Upon your first visit to the Renaissance laser skin center, the highly trained doctors will individually evaluate your skin care concerns to recommend the best possible laser treatments for you.

The institute was founded by a group of board certified plastic and vascular surgeons

who are true leaders in their respective fields.

This unique complimentary blend of services will allow the patient to benefit from the full scope of expertise available in aesthetic lasers, skin beautification, and venous disease. Every treatment will be planned after a private consultation with one of our board certified surgeons, so that your individual needs and concerns will be

addressed in the most medically sound and safe manner. This is what sets us apart from many other medical spas and laser practices in which

a patient may never have a chance to speak with a physician. At the Renaissance Laser & Vein Institute, you will find a warm and caring staff that will be attentive to your every need in a pleasant and professional environment.

Utilizing extensive training and experience along with the latest in laser technology, Dr. Gholam Mohammad-Zadeh, Dr. Kouros Azar, and Dr. Mohammad Gharavi offer their patients the most complete vein, face, and skin

rejuvenation treatments available. Serving Simi Valley, Westlake Village, Thousand Oaks, and surrounding areas, The Renaissance Laser

& Vein Institute should be your first choice for laser skin treatments.
